DIRECT, WHITE LENS

## Photometry

<b>Total Output</b>	<b>2375 lm</b>
<b>Efficacy</b>	<b>86.4 lm/W</b>
<b>CCT</b>	<b>3328K</b>
<b>CRI</b>	<b>81</b>
<b>R9</b>	<b>5</b>
<b>Distribution</b>	<b>0% Up / 100% Down</b>
<b>Spacing Criteria (0/90/180°)</b>	<b>1.10/1.07/NA</b>
Meets RP-1-04 recommendations for VDT-Normal spaces	

Values per 4ft unit

Fixture photometry has been conducted by an NVLAP accredited testing laboratory in accordance with IESNA LM-79-08

IES files for this and other photometric options can be downloaded online at [www.lightingproducts.philips.com](http://www.lightingproducts.philips.com)

<b>Total Harm. Distortion</b>	<b>7.5%</b>	<b>13.5%</b>
Tested values – contact technical support for rated values. Off-state power zero unless certain controls are specified.		

## DIRECT, WHITE LENS

### Options and Details

### Modules

Standard modules mount to mount dimensions.

Note: Refer to installation instructions for exact mount.

\* In-Run lens break = 52 mm & lens break at end = 31 mm

### Optics & Styles

Standard style lens at end (A)  
(31 mm lens break at each end)

Standard style lens at joint (A)  
(62 mm lens break at each joint)

### Housing

High purity extruded aluminum housing. Contains some recycled material.

### Optical System

In the lower hemisphere, white light from downward facing LED sources is directed towards the optical aperture using highly efficient Miro silver reflectors and diffused by a matte frost acrylic extruded lens. In the upper hemisphere, a smooth light distribution is achieved by a combination of the integral LED package optics and an acrylic diffuser / dust cover.

### Standard Driver

Dimming 0-10V, 10-100%, output is Class 2 rated.

Important: Fixture wired for non-dim operation unless dimming is specified.

### Lumen Maintenance

Lumen maintenance of the LEDs has been tested by the manufacturer in accordance with IESNA LM-80-08. At an ambient temperature of 25°C, the LED lumen maintenance expectation is:  $L_{80}$  (12k) 60,000h according to IES TM-21-11 Addendum A

Reported methodology

$L_{80}$  (6k) 72,000h according to IES TM-21-11 Projected methodology

### Electrical

Factory pre-wired to section ends with quick-wire connectors.

### Mounting

Fixed position mounts supplied standard at ends. Aircraft cable gripper provides infinite vertical adjustment capability. Aircraft cable, crimp and cable gripper independently tested to meet stringent safety requirements.

### Joints

Self-aligning joining system with hands-free pre-joining wire access.

### Endcaps

Each row is completed by a die-cast aluminum end cap. An internal draw-tight connector minimizes the joint line.

### Approvals

Complies to US and Canadian Safety Standards. UL or ETL listed and suitable for damp locations.

### Finish

High quality powder coated, available in matte White, Aluminum or Black. Other factory and custom colors available on request.

### Environment

Rated for dry or damp locations in operating ambient temperatures 0-40°C (32-104°F). Certain luminaire components may be adversely affected by contaminants. Damage caused by sulfur, chlorine, petroleum based solutions or other contaminants in the area of operation are not covered under warranty. Not suitable for natatorium environments.

Due to continuing product improvements, Philips Ledalite reserves the right to change the specifications without notice.
