* Nominal values within a range. Consult photometry data for exact color temp, lumens & distribution.
† Not all wiring types are available with all configurations. Consult Philips Ledalite for a complete list of available options.
Mounting Hardware

	Mount Type
	Consult separate mounting spec sheet for mount type options

DIRECT PERFORMANCE, FLUSH MESOOPTICS LENS

Photometry

0% Up / 100% Down

Total Output	2128 lm
Efficacy	76.0 lm/W
CCT	3084K
CRI	82
Distribution	0% Up / 100% Down
Spacing Criteria (0/90/180°)	1.41/1.75/NA
Meets RP-1-12 recommendations for VDT-Normal spaces	

Values per straight 4ft unit

Fixture photometry has been conducted in accordance with IESNA LM-79-08

IES files for this and other photometric options can be downloaded online at www.lightingproducts.philips.com

Input Current	0.24A	0.12A
Power Factor	0.983	0.878
Total Harm. Distortion	16.5%	19.3%

Tested values – contact technical support for rated values. Off-state power zero unless certain controls are specified.

Modules & Runs
TruGroove LED Corners nominal sizes

2ft × 2ft 90° flat lit corner unit
2ft × 2ft 90° outside lit corner unit
Inside 90° joiner bracket

Outside corners can be installed either wall-to-wall or wall-to-ceiling.

Refer to module size details below for actual dimensions. Outside corner units are only available in drywall trimless mount. Inside corners are built from two straight runs and a corner joiner kit.
Please provide pattern drawings or sketches with dimensions.
To specify continuous straight runs, refer to TruGroove Continuous data sheets.

Housing

Die-formed 20 gauge cold-rolled steel. Multiple upper wire entrances available for continuous row mounting of fixtures.

Weight

Maximum 3.5lb/ft.

Optical System

Performance version: White light emitted from the LED sources is internally reflected and laterally redirected by a biconvex lens. Light is then reflected by Miro Silver panels and exits through the optical lens assembly. This assembly contains acrylic extrusion profiles to retain a layer of MesoOptics film, creating both an uninterrupted continuum of light and an optical batwing distribution.

Definition version: Light passes through a diffuse white acrylic lens to deliver a highly uniform luminous continuum.

Standard Driver

Dimming: 0-10V, 5-100%. Output is Class 2 rated.

Lumen Maintenance

At an ambient temperature of 25°C in non-insulated contact applications, the LED lumen maintenance expectation for each lumen package is:
K: L_{80} (12k) 71,000 hrs
G: L_{80} (12k) 68,000 hrs
E: L_{80} (12k) 54,000 hrs

Mounting

Mounting brackets on housing sides support T-Grid installation. 1/16'' diameter aircraft cable with self-locking, tamper-resistant, miniature cable gripper provides vertical adjustment for drywall. Aircraft cable, crimp and gripper independently tested to meet stringent safety requirements.

Joints

Self-aligning joining system with hands-free pre-joining wire access.

Electrical

Factory pre-wired to section ends with quick-wire connectors.

Approvals

Certified to UL, CSA and IES standards. Insulation Contact (IC) rated.

Finish

Extruded aluminum trim and die-cast endplates coated with electrostatically applied and thermally cured polyester powder coat paint finish.

Environment

Rated for dry or damp locations in operating ambient temperatures 0-40°C (32-104°F). Certain luminaire components may be adversely affected by contaminants. Damage caused by sulfur, chlorine, petroleum based solutions or other contaminants are not covered under warranty.

Due to continuing product improvements, Philips Ledalite reserves the right to change the specifications without notice.
